

ASHISH KUMAR ROY

📍 New Delhi , India 📞 +91 9625434563 ✉ ashishkumarroy2502@gmail.com

Objective

Confident Full Stack Developer with hands-on experience in HTML5, CSS3, JavaScript (ES6+), React.js, Typescript and Node.js. Skilled in building scalable web apps, integrating APIs, and working with MySQL and MongoDB. Familiar with DevOps tools like Docker, CI/CD, and AWS. Quick to learn, strong in problem-solving, and eager to contribute to impactful tech solutions.

Education

S.R.M Institute of Science and Technology
Computer Science
7.87 CGPA

JUNE 2021 - JULY 2025
B.Tech

Projects

Curtain Verse

🔗 <https://github.com/ashishroyx/CurtainVerse>

- Developed **CurtainVerse**, a responsive full-stack web app using **Next.js**, **TypeScript**, **Tailwind CSS**, and **Sanity CMS**, allowing poets and writers to publish and explore creative content with a seamless, performance-optimized experience.
- Integrated secure **authentication with NextAuth**, user profile management, and content creation features using **Sanity's schema-based CMS**, while ensuring smooth CRUD operations with **MongoDB and MySQL**.
- Built and styled dynamic components like **hero section**, **search form**, **content cards**, and **detailed views**, enabling real-time search via URL query params and maintaining high accessibility and UI consistency across devices

Respawn

🔗 <https://github.com/ashishroyx/Respawn>

- Built **Respaen**, a gamer-centric blogging platform using **React**, **Tailwind CSS**, and **Appwrite** for full-stack functionality including authentication, secure CRUD operations, and real-time database management for posting and managing gaming experiences.
- Designed a dynamic and responsive UI with smooth **animations using Framer Motion**, enabling seamless user interactions, profile management, and post creation/editing across devices while ensuring performance and accessibility.

Savorly

🔗 <https://github.com/ashishroyx/Savorly>

- Developed **Savorly**, a visually engaging recipe discovery platform built with **React**, using **React Router**, custom state management, and external **API integration** to fetch and display curated recipes, popular picks, and detailed meal data.
- Delivered an interactive and seamless user experience with custom **search functionality**, dynamic routing, and rich **animations using GSAP and Framer Motion**, enhancing performance and visual appeal across devices.
